DA VINCI'S WORKSHOP

Catch the Science Centre's Facebook Live Event!

The Ontario Science Centre is set to explore the theme of modern innovation in its first-ever Facebook Live event, which will be held inside Leonardo da Vinci's Workshop: The Exhibition. The 45-minute show is called "Inspiring Inventiveness: Beyond da Vinci" and it runs live on our Facebook page on February 2nd.

We will examine da Vinci's amazing contributions to modern invention and how his spirit can spur young minds toward invention in a much different world. Is today's generation perhaps better equipped to make new discoveries and change the world? What can we learn from one of history's great minds?

We have assembled a four-person panel of experts, including Canadian innovator Michael Serbinis, president of Kobo, a global eReading Company and da Vinci expert Massimiliano Lisa who curated our wonderful exhibition. Our moderator is CBC news icon Wendy Mesley, who will also take questions from a live Facebook audience. We hope that will include you! (Also get involved in the conversation on Twitter using hashtag #innovinci.)

Here are the details:

What: Special live panel discussion about Leonardo da Vinci and modern invention.

Who: **Wendy Mesley**, Host, CBC Television – *Moderator*
Michael Serbinis, President and CEO, Kobo Inc. – *Canadian Innovator*
Massimiliano Lisa, Founder of Leonardo3 – *Da Vinci Expert*
